

Cutting edge solutions for the international marine industry

NAVIGATION - COMMUNICATION - IT - SECURITY - AIRTIME - 24/7 SERVICE

Zeatec

When reliable solutions are needed

When reliable solutions are

Zeatec Marine AB is a professional international front-line company, supplying the marine industry with cutting edge navigation-, communication-, IT- and security solutions. We take full responsibility all the way from project phase to installation, commissioning and to a complete worldwide service.

Dedicated staff

Our staff have long experience from different marine sectors such as shipyards, shipping companies, installation companies and system suppliers from many countries. The Main Office is located in Landskrona, Sweden as a part of the Maritima center in Oresund Dry Dock (ODD).

Our customers

Our customers are among Swedish and foreign shipping companies and different shipyards all over the world. We focus on technical solutions for professional users in shipping. Among our customer applications are tankers, smaller passenger vessels, tugboats and commercial fishing vessels and others.

Design and engineering

We deliver basic design and engineering of all customer projects, project management and supervision up to a complete turn-key solution.

Service and support

Our 24/7 onboard service secures quick and reliable support from our engineers which are approved by the manufacturers. We also offer a worldwide service network based on long experience from service and maintenance.

Airtime solutions

We offer a wide selection of satellite airtime options. In secure datatrafic via satellite, we can offer state of the art V-SAT solution and the reliable Inmarsat traffic anywhere on the planet – even in the most remote regions on earth.

Zeatec

Customized solutions

Zeatec Marine AB provides customized solutions for special needs according to your requirements. In order to satisfy our customers, we always strive to find the most cost efficient solution.

Long time business relations

It is very important for us to have a close cooperation with our customers as we always strive for long time business relations. Therefore support and after sales are significant to us.

Increased value to our customers

Our solutions play a key role ensuring that shipments move swiftly and safely along our marine highways, and we always focus on adding increased value to our customers.
